

Medication Policies and Procedures Acknowledgment Form

Parents/guardians are encouraged to administer medications to their children at home to the greatest extent possible. Should your child require **prescription, over-the-counter (OTC), or herbal** medication while attending school, the following policies and procedures must be followed:

- ❖ **All medications**, whether prescription, over-the-counter, or herbal *must* be delivered and signed in to the school nurse by the student's parent/guardian. The medication will be signed out and returned to parent/guardian at the end of each school year.
- ❖ **A School Medication Prescriber /Parent Authorization Form** must be completed and signed by both physician and parent for each medication, before **ANY** prescription, non-prescription, or herbal medication can be administered at school. A copy of this form can be found on the RISE Center website.
- ❖ If the medication order is **changed** during the school year, a **new School Medication Prescriber/Parent Authorization Form** is required. Both the prescriber and parent/guardian must sign the new form. The exception to this is if the prescriber submits a hand written order.
- ❖ For **Prescription** medications, a **current pharmacy labeled** container is required which includes the student's name, physician name, name of medication, strength, dosage, time interval, route and date of drug's discontinuation when appropriate.
- ❖ For **over-the-counter** medications, an **original** container is required and all manufacturers' labeling must be clearly legible. The student's name must be written on the container.
- ❖ The school nurse will not administer any medication when there is any discrepancy (i.e., label different from instructions or contents, label is unclear or label torn).
- ❖ All over-the-counter medication must be supplied by the parent/guardian and accompanied by a **School Medication Prescriber/Parent Authorization Form**. The school will not supply, provide or stock over-the-counter medications (i.e., antibiotic ointment, Benadryl, etc).
- ❖ In accordance with FDA regulations and recommendations from the American Academy of Pediatrics, no over-the-counter (OTC) cough and cold medications will be administered to children under the age of six. **There are no exceptions to this**. If a cough and cold medication is to be administered, a physician's order must be submitted **PRIOR** to the medication being given.

These procedures were adopted with your child's safety in mind. If you have any questions concerning these medication procedures, please contact Kim Burke, RN, Lead Nurse.
